Sport and Migration - Joseph Maguire 2010-10-18

In this dazzling collection of papers, leading international sport studies scholars chart the patterns, policies and personal experiences of labour migration within and around sport, and in doing so cast important new light both on the forces shaping modern sport and on the role that sport plays in shaping the world economy and global society. It contains a broad range of case studies focusing on such diverse areas as European and African soccer, Japanese baseball and rugby union in New Zealand.

Z is for Zamboni - Matt Napier 2013-08-15

In the mold of our very popular series of state alphabet books, we offer "Z is for Zamboni" to hockey fans young and old across North America. Matt Napier's "breakaway" rhymes and "hard-checking" expository text team up with the "top-shelf" illustrations of Melanie Rose to elucidate this increasingly popular game for every beginning hockey aficionado. Highlighting rules, players, coaches, teams, and the history of the game, it is both fun and educational.

One Trick Pony - Nathan Hale 2017-03-14

The aliens have arrived. And they're hungry for electricity. In the Earth of the future, humans are on the run from an alien force—giant blobs who suck up electrical devices wherever they can find them. Strata and her family are part of a caravan of digital rescuers, hoping to keep the memory of civilization alive by saving electronics wherever they can. Many humans have reverted to a pre-electrical age, and others have taken advantage of the invasion to become dangerous bandits and outlaws. When Strata and her brother are separated from the caravan, they must rely on a particularly beautiful and rare robot pony to escape the outlaws and aliens—and defeat the invaders once and for all.

High Tech Hot Shots - Celeste Baine 2004

Written for high school and pre-engineering college students, this book compiles resources, information, and stories of engineers who design new and improved products. Ranging from the design and construction of stadiums and courses to the design and manufacture of sporting equipment and clothes, the book reveals what you need to know to work in this industry, and find a rewarding job as a sports engineer. Explore what types of engineers are involved in extreme sports like skateboarding to the more traditional sports like tennis, and get advice from engineers about how to succeed as a sports engineer.

The Writer's Way - Jack Rawlins 1996

Leading students step by step through the writing process, from pre-writing to the final draft, this text is based upon the theory that people learn best by doing the whole thing to be learned and doing it often, surrounded by examples and in a context that offers immediate personal rewards. It focuses on personal motivation, interaction with other writers, and revision, and includes 47 student papers which serve as models for skills such as abstracting, revising and peer editing.

Building Peace on Earth - Mathews George Chunakara 2013

The International Ecumenical Peace Convocation (IEPC), organized by the World Council of Churches in May 2011, brought together more than 1,000 participants from more than 100 countries. This historic gathering encouraged individuals and churches to renew their commitment to nonviolence and peace with justice, and it gave impetus for the wider ecumenical family and its related constituencies to pursue their search for peace. This book is the final report of the Convocation, offering an overview of the entire proceedings of the IEPC - from opening plenary, to thematic plenaries, to workshops and side events. With a wealth of ideas and reflections on peace with justice, the book serves not only as a record of this historic event, but also as a helpful toolkit for peacemakers and an engagement with the issues and themes related to the 2013 WCC assembly theme: "God of life, lead us to justice and peace."

Dun & Bradstreet/Gale Group Industry Handbook - Jennifer Zielinski 2000

These volumes are compilations of data from select, commonly found titles, published by Gale in partnership with Dun & Bradstreet, on a small but important group of industries. For each industry, there is an overview; a compilation of business statistics from the federal government; performance indicators; financial norms and ratios; a directory of companies; rankings, recent mergers, and acquisitions; associations; consultants; trade information sources and trade show data; and a short bibliography of articles from trade magazines. Each volume has the usual fine set of Gale indexes. There are SIC (Standard Industry Classification) to NAICS (North American Industry Classification) and NAICS to SIC conversion guides, a geographic index, and a master index. The convenient organization by industry is certain to be appreciated by undergraduates, yet libraries should be aware that most of this material is repackaged from

other sources, which include Million-Dollar Directory, Dun & Bradstreet's Industry Norms and Key Business Ratios, and Gale's excellent Encyclopedia of Associations, Consultants and Consulting Organizations Directory, Encyclopedia of Business Information Sources, and Trade Shows Worldwide. The new volumes are well documented, clearly citing the source for the original data and for the government statistics presented in Chapter 2. The merger and acquisition information is easy to read but not as complete as in Moody's manuals, and the industry overview is not quite as detailed as the Standard & Poor's Industry Surveys, but the introductory matter is more clearly written than in most business references. Libraries that own all or most of the titles listed here will find that this set duplicates and does not supersede the originals. Yet an undergraduate library with a small business collection will find these titles a good buy, and two-year colleges, high schools, and small or medium-sized public libraries can use them to build up their business collections relatively inexpensively. -Library Journal.

The Disposable Skateboard Bible - Sean Cliver 2019-10-02

Celebrate the 10th anniversary of the greatest skateboard deck compilation with this special print edition of *The Disposable Skateboard Bible*. With the release of *Disposable: A History of Skateboard Art* in 2004, author Sean Cliver made a brilliant attempt at artfully cataloging every important skateboard deck ever released. In the process, he created a classic, but was left feeling less than satisfied. Ever the completist, the gaping omissions in the first book gnawed at him and drove him to envision compiling the ultimate encyclopedia of skateboard decks. While *Disposable* was beautiful, capturing the essence of the aesthetic, *The Disposable Skateboard Bible* sets out to be the ultimate guide. The author's industry insider status (in 1989 he landed his first job as a designer at Powell-Peralta) allows him to guide readers through the culture and experience, the art and the mania of the skate world with authority and expertise. While the boards take center stage, fascinating vignettes and recollections by an A-list of skateboarding personalities from Tony Hawk to Mike Vallely, Mark Gonzales to Stacy Peralta and more.

Seeing Nature Through Gender - Virginia Scharff 2003

Environmental history has traditionally told the story of Man and Nature. Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender. *Seeing Nature through Gender* here reintroduces gender as a meaningful category of analysis for environmental history, showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial

borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature, on questions about consumption, on environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the "ecofeminist" position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly—often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds, of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition, of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities. Some are playful, as in a piece on the evolution of "snow bunnies" to "shred betties." Others are dead serious, as in a chilling portrait of how endocrine disrupters are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet.

Snowboard - Joseph Gustaitis 2009-08

Snowboard is one of the youngest sports in the Olympics, and it was once viewed as the sport of "bad boys" and "rebels." It might have lost some of that rowdy image, but it still has its pop pizzazz. This book will explain what stunts are and how they're done. It'll tell you where snowboarding came from and where it's going. And you'll meet some of the most colorful characters you'll find in any sport.

Snowboarding in Southern Vermont - Brian L. Knight 2018-11-26

During the 1980s and 1990s, the "Manchester and the Mountains" area of Vermont was the epicenter of the fledgling sport of snowboarding. With the presence of Burton Snowboards, the U.S. Open Championships and one of the earliest machine-built halfpipes at Stratton Mountain, the local population led the vanguard as the sport ventured from the fringe to mainstream. Ranging from Olympic gold medalists to backhoe operators and converted skiers, locals contributed immensely to the development of the sport. Author Brian Knight details the birth, growth and development of a new worldwide sport from humble beginnings in southern Vermont.
