Physics and Literature - Aura Heydenreich

2021-12-20

DIE REIHE: LITERATUR- UND

NATURWISSENSCHAFTEN entsteht unter Federführung des Erlanger Forschungszentrums für Literatur- und Naturwissenschaften (ELINAS). Experten unterschiedlicher Fachkulturen führen darin ihre Methoden zusammen und fragen sowohl nach den Funktionen der Sprache in der naturwissenschaftlichen Forschung als auch nach den Verfahren der Modellierung naturwissenschaftlicher Erkenntnisse in der Literatur. Die Reihe versteht sich als ein interdisziplinäres Forum zur Reflexion der kulturellen Bedeutung natur- und literaturwissenschaftlicher Forschung sowie zur Ethik und Rhetorik wissenschaftlicher Argumentation.

Principles of Biology - Lisa Bartee 2017

The Principles of Biology sequence (BI 211, 212 and 213) introduces biology as a scientific discipline for students planning to major in biology and other science disciplines.

Laboratories and classroom activities introduce techniques used to study biological processes and provide opportunities for students to develop their ability to conduct research.

The Boy in the Striped Pajamas - John Boyne

2008-12-18

Two young boys encounter the best and worst of humanity during the Holocaust in this powerful read that USA Today called "as memorable an introduction to the subject as The Diary of Anne Frank." Berlin, 1942: When Bruno returns home from school one day, he discovers that his belongings are being packed in crates. His father has received a promotion and the family must move to a new house far, far away, where there is no one to play with and nothing to do. A tall fence stretches as far as the eye can see and cuts him off from the strange people in the distance. But Bruno longs to be an explorer and decides that there must be more to this desolate new place than meets the eye. While exploring his new environment, he meets another boy whose life and circumstances are very different from his own, and their meeting results in a friendship that has devastating consequences.

Forceful Experiences - Christina Hart

2017-01-21

This resource, for teachers and students of general science at the junior high school level, introduces Newton's Laws of motion at a qualitative level. 'Forceful Experiences' takes students' experiences of motion as a starting point, and guides them to construct a more powerful framework for understanding their everyday world. The approach also provides a secure foundation for those students who will go on to study physics at a more advanced, mathematical level. Features include: Short summaries of the main conceptual points are provided at the end of each chapter. There are frequent opportunities for students to 'Pause for thought' and engage with the ideas they have

encountered. These can be set as homework activities and used for small group discussions. At strategic points students are challenged to demonstrate what they have learned. Teachers can use these tasks as a basis for formative and/or summative assessment. An accompanying web page provides supporting materials for teachers and students.

Marsden's Book of Movement Disorders - Ivan Donaldson 2012-03-29

This book represents the final work of the late Professor C. David Marsden, who was the most influential figure in the field of movement disorders, in terms of his contributions to both research and clinical practice, in the modern era. It was conceived and written by David Marsden and his colleague at the Institute of Neurology, Prof. Ivan Donaldson. It was their intention that this would be the most comprehensive book on movement disorders and also that it would serve as the 'clinical Bible' for the management of these conditions. It provides a masterly survey of the entire topic, which has been made possible only by vast laboratory and bedside experience. Marsden's Book of Movement Disorders covers the full breadth of movement disorders, from the underlying anatomy and understanding of basal ganglia function to the diagnosis and management of specific movement disorders, including the more common conditions such as Parkinson's Disease through to rare, and very rare conditions such as Niemann-Pick disease. Chapters follow a structured format with historical overviews, definitions, clinical features, differential diagnosis, investigations and treatment covered in a structured way. It is extensively illustrated with many original photographs and diagrams of historical significance. Among these illustrations are still images of some original film clips of some of Dr. Marsden's patients published here for the first time. Comprehensively referenced and updated by experts from the Institute of Neurology at Queen Square, this book is a valuable reference for, not just movement

disorder specialists and researchers, but also for clinicians who care for patients with movement disorders.

Chemistry, Loose-Leaf Edition - Jill Kirsten Robinson 2019-01-04

NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes - all at an affordable price. For loose-leaf editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title and registrations are not transferable.

You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For two-semester general chemistry courses (science majors). Give students a robust conceptual foundation while building critical problem solving skills
Robinson/McMurry/Fay's Chemistry, known for a concise and united author voice, conceptual focus, extensive worked examples, and thoroughly constructed connections between organic, biological, and general chemistry, highlights the application of chemistry to students' lives and careers. Lead author Jill Robinson strengthens the student orientation by creating more engaging, active learning opportunities for students and faculty. With the

8th Edition, Robinson draws upon her exceptional teaching skills to provide new interactive experiences that help identify and address students' preconceptions. Robinson complements active engagement in the text with a new media program that increases student awareness of their learning process via Mastering Chemistry and the Pearson eText, allowing instructors to choose the level of interactivity appropriate for their classroom. Interactive experiences include activities that guide students in how to actively read a science text and that address common preconceptions, giving students opportunities to cultivate and practice problem-solving skills. Also available with Mastering Chemistry By combining trusted author content with digital tools and a flexible platform, Mastering personalizes the learning experience and improves results for each student. The fully integrated and complete media package allows instructors to engage students before they come to class, hold them accountable for learning during class, and then confirm that learning after class. NOTE: You are purchasing a standalone product; Mastering(tm) Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering Chemistry, ask your instructor to confirm the correct package ISBN and Course ID. All Quiet on the Western Front - Erich Maria Remarque 1996-09-29

Considered by many the greatest war novel of all time, *All Quiet on the Western Front* is Erich Maria Remarque's masterpiece of the German experience during World War I. I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. "The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure."—The New York Times Book Review

God's Perspectives on Finances - Larry Kreider 2019-07-26

The foundation of the Christian faith is built on Jesus Christ and His Word to us, the Holy Bible. This Biblical Foundation Series includes elementary principles every Christian needs to help lay a strong spiritual foundation in his or her life. In this tenth Biblical Foundation book, *God's Perspective on Finances*, we learn that God wants to bless us financially! God desires to meet our needs and provide abundantly for us to

minister to others. We will learn that the tithe is a numerical expression reminding us that all we have belongs to God. We are merely managers of the material goods we possess. Scripture has a tremendous amount to say about money or material possessions. Money is such an important issue because a person's attitude toward it often is revealing of his relationship with God. God wants to restore a healthy, godly understanding of finances in the body of Christ today. In this book, the foundation truths from the Word of God are presented with modern day parables that help you easily understand the basics of Christianity. Use this book and the other 11 Biblical Foundation books to lay a solid spiritual foundation in your life, or if you are already a mature Christian, these books are great tools to assist you in discipling others. Also available in Spanish and French.
